To Whom it may concern:

Reference: Command IT Services

We recently were having productivity issues with slow and quite often not working computers. The time had come for an expert!!

We enlisted the services of Command IT Services, who promptly came out to the office and conducted a diagnostic check of our system. This was done with professionalism and with respect to our operations. Once this had been completed we were handed a report with suggestions on how to bring the system up to scratch.

They did all the leg work including liaising with our Accounting software supplier, Human Resources software supplier and the setting up of our Internet Service Providers'. All our email addresses were set up and this was all done off site as to not upset our daily business.

The moving from the old system to the new system was seamless and completed with no fuss or most importantly – time lost!

Our complete system is monitored by them and occasionally we receive a phone call re our backups not been done correctly or the like.

We have since re approached them regarding the set up of VOIP – this has also been a pleasurable experience although not yet implemented.

I have full confidence in them and have great pleasure in referring them to anyone.

Regards

Guy Cavanagh

Director
